Greetings Lou,

How are you? Enjoying retirement? I retired last year (in Jan. 2003), but still come into NGS 2 days per week to work on a contract I have with them to do some standards work.

As you know the government bureaucracy moves slowly. Finally, NGS has implemented your suggestion to add the Combined Factor to the Geodetic Control Data Sheets. Go to our Web site (<http://www.ngs.noaa.gov/>) and try one out. Let me know how you like it.

See yah,
"Retired Ed"
